JOSÉ AGUSTÍN SPACCESI

Product Design and Manufacturing

OBJECTIVE

I am a multidisciplinar person interested in many fields, mostly related with design and engineering. My studies are very generic and I am restless and curious. All that give a widely background in many different branches of engineering, as well as in many other fields, making me the best person for deal with a problem and find a solution.

My current goal is to work abroad in order to become the best possible engineer, in a company related with my passion, which is **Product Design**.
